

Implicit Cursor Q2

To write a PL/SQL program to update salary of all employees by 20%. If total salary>100000 then rollback else commit.

CODE

declare

sal income.salary%type;

begin

update income set salary=salary+((.02)*salary);

select sum(salary) into sal from income;

if sal>100000 then

rollback;

else

commit;

end if;

end;

OUTPUT

PL/SQL procedure successfully completed.

SQL> select * from income;

ENAME	SALARY
Sindhu	25750
Susan	25000
Alu	105000
Annu	100000
