

# To write a PL/SQL program to find area of circle and square

CODE

declare

    r number;

    l number;

    c number;

    d number;

begin

    r:=&r;

    l:=&l;

    c:=3.141\*r\*r;

    d:=l\*l;

    dbms\_output.put\_line('Area of circle is ' || c);

    dbms\_output.put\_line('Area of square is ' || d);

end;

## OUTPUT

```
SQL> set serveroutput on
SQL> @Z:\DBMS\notepad\product.sql
19 /
Enter value for r: 4
old 8: r:=&r;
new 8: r:=4;
Enter value for l: 4
old 9: l:=&l;
new 9: l:=4;
Area of circle is 50.256
Area of square is 16

PL/SQL procedure successfully completed.
