Implicit Cursor Q3

Create a table student(rollno, stud_name,sessionals, univ_mark). If the sessionals+univ_mark>150, raise an error message. Also handle all the possible exceptions.

CODE

```
declare
 uni sstudent.univ_mark%type;
 ses sstudent.sessionals%type;
 e exception;
begin
 select univ_mark,sessionals into uni,ses from sstudent where rollno= &rollno;
 if(uni+ses)>150 then
   raise e;
 end if;
exception
 when e then
  dbms_output.put_line('Error Encountered!');
 when no_data_found then
  dbms_output.put_line('No data found!');
 when others then
  dbms_output.put_line('Error!');
end;
```

OUTPUT

```
SQL> set serveroutput on
SQL> /
Enter value for rollno: 5
old   6:  select univ_mark,sessionals into uni,ses from sstudent where rollno= &rollno;
new   6:  select univ_mark,sessionals into uni,ses from sstudent where rollno= 5;
No data found!
